Kubernetes BRMS POD

Kubernetes EAP POD

redhat/xpaas-uberfire-cluster-controller

- ☐ zookeeper
- ☐ helix-controller

(Optional) Database

Kubernetes BPMS POD

Notes:

- The docker images for standard products are still under development & the names are not the final ones yet (contact: mgoldmann)
- The xpaas-haproxy image is just needed until openshift 3 will be ready, then it will be replaced by the load balancer provided by openshift
- Kubernetes integration is still under development

- ☐ Ports
- ☐ Cluster configuration
- ☐ Database drivers
- ☐ Users configuration
- ☐ Custom modules
- ☐ Openshift 3 specific config
